Anti-Drug Cell

The Anti-Drug Cell is a proactive initiative aimed at creating awareness, preventing drug abuse, and promoting a healthy, drug-free lifestyle among our students. Students benefit from joining anti-drug clubs as they provide education on the risks of substance abuse, offer a supportive community to discuss concerns, promote advocacy for drug-free lifestyles, foster personal development through leadership and teamwork, contribute to prevention efforts via awareness campaigns, and empower students to influence their peers positively, thereby creating a healthy campus and community environment overall.

START RUN STOP DRUGS

On June 26, 2026 (Friday), the Anti-Drug Cell of SSMIET took part in the Start Run Stop Drugs-Marathon, which was organized by our Tamil Nadu government and ran five kilometres from Collector Bungalow to Collector office Playground.
