Department of Computer Science and Business Systems

2024-2025 EVEN

ABOUT THE DEPARTMENT

Our department is established in the year 2022. It is approved by all India Council for Technical Education (AICTE), Accredited by NAAC and affiliated to Anna University, Chennai. Our department is committed to promote and support effective learning and teaching through talented and experienced team of faculty members who motivate students to achieve their academic and career goals. Academic counseling to the needy helps the students identify their innate talents, shed inhibitions and emerge as industry ready technocrats. Emphasis on co-curricular and extracurricular activities provides variety to the learning atmosphere and the students emerge as multi-faceted personalities. We equip our students with the State of Art computer laboratories comprises of computer systems with latest configurations, operating systems, and as well as the developmental platforms of software and helping applications. We are motivating our students to achieve University Results, to undergo in plant training, Industrial visits and Internships in multinational companies continuously. Our students are placed in Mind tree, Infosys, Wipro, Accenture and many more corporates every year.

Vision

To lead the way in interdisciplinary education, shaping the next generation of technology-driven business leaders by seamlessly integrating computer science and business principles to empower students to address societal challenges through innovation and entrepreneurial skills.

Mission

- To provide holistic education that bridges the gap between the fields of computer science and business systems, empowering students with a solid foundation in various domains and promoting innovative methods in research and academics.
- To establish strong partnerships with industries to provide conceptual knowledge that enables experiential learning for students in the ever-changing industry landscape.
- To offer comprehensive technology training to ensure that students are proficient in the latest tools and methodologies crucial for success in the fields of computer science and business systems.
